MotiveWave Announces New Free Community Edition Charting Software

MotiveWave Software has expanded its charting and trading platform lineup to include a free charting software called the Community Edition, available for Windows, macOS and Linux.

Kelowna, BC – July 6th, 2020 - MotiveWave Software, a Kelowna-based developer of easy-to-use high-performance charting and trading software, has announced the addition of a free charting software to its product lineup, named the Community Edition.

The MotiveWave Community Edition has high quality charting, Replay Mode and built-in trade simulation, and is available for Windows, macOS and Linux.

"We feel our Community Edition fills a much needed gap in the free desktop charting software space", said Tony Lindsay, Founder of MotiveWave Software, "There aren't a lot of options when it comes to free, high-quality charting solutions, and we believe that MotiveWave's Community Edition fills that gap."

The Community Edition charting software comes with a comprehensive set of charting tools including:

- 283+ Built-in Studies, including Volume Profile and VWAP
- 19 Standard Linear Bar Types
- General Analysis Tools (Lines, Channels, Forks, and many more)
- Advanced Commentary and Marker Tools
- Chart Templates and Chart Linking
- Fibonacci Tools

The Free Community Edition also enables you to practice your trading and test out new trading ideas in MotiveWave's Replay Mode using the built-in simulated account.

MotiveWave's Replay Mode enables you to go back to a specific date and time to replay market data, as well as linking charts for use in Replay Mode to have multiple charts all step forward together at the same time.

MotiveWave's built-in simulated account lets you see your simulated positions, orders, and trade history.

MotiveWave also has a free Java Software Development Kit (SDK) that enables you to build and develop your own indicators and automated strategies. Or you can use 3rd party add-ons to enhance your MotiveWave platform, found in the MotiveWave Marketplace.

MotiveWave can be used to trade any securities that your broker or data service supports. These may include stocks, futures, options, equities, cryptocurrencies and Forex. MotiveWave currently supports 30+ brokers and data service providers.
