

## MotiveWave Software Releases Mac OSX Version of its Trading Platform

**TORONTO, ON – September 8, 2011** – MotiveWave Software, an up-and-coming provider of charting, analysis and trading software, announced today the release of a Mac OSX version of its MotiveWave charting and trading platform.

MotiveWave is a charting, analysis and trading platform that also specializes in Elliott Wave, Fibonacci, Gann and Gartley trading strategies. MotiveWave's advanced Elliott Wave tools make it easier and faster for Elliott Wave traders to create their Elliott Wave Analysis, for example, wave labels are automatically added to the chart.

The MotiveWave Elliott Wave components allow Elliott Wave traders to shorten their learning curve and to be more confident in their wave counts. MotiveWave will tell them when and how an Elliott Wave Theory rule has been broken, allowing them to adjust their plotted wave counts accordingly. Auto Elliott Wave and Auto Gartley tools are also available.

MotiveWave's Mac version has all of the features and functionality found in the MotiveWave Windows version and incorporates standard Mac practices; it is a true Mac version.

"MotiveWave's charting and trading platform is very easy-to-use whether you're a beginner, a market analyst or a professional discretionary trader," said Tony Lindsay, Founder of MotiveWave Software. "We know it's hard for Mac users to find a true Mac charting and trading platform so we are excited that we can now offer the same MotiveWave ease-of-use, advanced charting and functionality in a Mac version," added Lindsay.

MotiveWave can be used to trade any securities that your broker or data service supports. These may include stocks, futures, options, equities and forex.

To get a full-access 14-Day free trial of the MotiveWave Mac OSX version, visit [www.motivewave.com/free\\_trial.htm](http://www.motivewave.com/free_trial.htm).

### **About MotiveWave Software**
