

MotiveWave Software Releases Version 1.1 with Auto Elliott Wave

TORONTO, ON – July 15, 2011 – MotiveWave Software, an up-and-coming provider of charting analysis and trading software for the individual active trader, just released version 1.1 of the MotiveWave trading platform with Auto Elliott Wave.

MotiveWave is a charting analysis and trading platform that also offers Elliott Wave, Fibonacci, Gann and Gartley trading strategies. With the release of MotiveWave's Version 1.1, the already advanced Elliott Wave tools have been taken to the next level with Auto Elliott Wave. In MotiveWave, you could always manually plot your Elliott Wave counts and have the wave labels automatically appear on your charts, instead of manually adding a text label for each point, but now, with the Auto Elliott Wave features, MotiveWave will automatically fill in the best wave patterns for you (based on all of the Elliott Wave Theory rules and guidelines) and allow you to automatically decompose those wave patterns down two levels as well.

The manual Elliott Wave tools are still in MotiveWave for those who like to manually plot wave patterns, and the new Auto Elliott Wave tools, as with all components in MotiveWave, can still be moved or edited after they have been placed on the charts.

"MotiveWave's charting and trading platform is very easy-to-use whether you're a beginner, a market analyst or a professional discretionary trader," said Tony Lindsay, Founder of MotiveWave Software. "With the addition of Auto Elliott Wave, we believe it is even easier to learn Elliott Wave and be confident that your wave counts are correct in your Elliott Wave analysis," added Lindsay.

To get a full access 14-Day free trial of MotiveWave, including the Auto Elliott Wave functionality, visit www.motivewave.com/free_trial.htm.

About MotiveWave Software

Founded in 2010, MotiveWave Software (www.MotiveWave.com) is quickly emerging as a leading developer of easy-to-use high-performance charting and trading software for the individual active trader.
